BREATHCARE ANESTHESIA

LB1810 Three balls Incentive Spirometer

600cc/sec+900cc/sec+1200cc/sec

The three balls Incentive Spirometer is designed to encourage the user to take deep breath. The spirometer provides patient feedback by showing how well the patient is expanding their lungs.
This deep breathing encourages the clearance of phlegm from the lungs.

LB1811 Volumetric Incentive Spirometer

Size: 3000ml, 5000ml

Incentive Spirometer is handheld medical device that measures the volume of patients' breath.
It helps patients' lungs recover after surgery or lung illness, keeping them active and free of fluid.
The patients are encouraged to breath in from the device as slowly and as deeply as possible.

LB5051 Endobronchial Blocker Tube

Endobronchial blocker tube is a device which can be inserted down a tracheal tube after tracheal intubation so as to block off the right of left main bronchus of the lungs in order to be able to achieve a controlled one lung ventilation.The lung tissue distal to the obstruction will collapse,thus allowing the surgeon's view and access torelevant structures within the thoracic cavity.
Our blocker tubes are used to achieve lung separation and one lung ventilation as an alternative to Double-lumen tubes(DLT) and serve as a choice for pediatric patients as well.

Tracheostomy Tube Holder

Tracheostomy Tube Holders are designed to provide secure positioningand to minimize movement of the tracheostomy tube. Unnecessary movement of the trach tube can result in accidental dislodgement or displacement of the tube, tracheoesophageal fistula, tracheal stenosis, or airway granuloma.
Features:
Made of latex-free, foam-padded cotton for patient comfort
Velcro hooks attaching easily to the neck flange
Wide band tapers at hooks to reduce excess secretion accumulation
Soft materials and wide band provide better skin care

FY0240
Vacuum Drainage Bottle

The Vacuum Drainage Bottles are intended to aspirate, remove,
or sample body fluids. They are shatterproof, light weight, clear plastic
bottles that provide containment of bio-hazardous fluids.
Vacuum drainage bottle system provides a suction source that help to
drive wound drainage. It consists of a vacuum drainage bottle,
a connecting tube and a drain with trocar.
Size: 400ml, 600ml, 1000ml

FY0241
Disposable Drainage Bottle Equipment

Single bottle, 1600ml
Double bottle, 2000ml
Three bottles, 2500ml

support and suspension hook constitution.

FY0241W
Disposable Water Seal Chest Drainage System

It is used in pneumothorax or fluid in thorax
caused by traumatic hemopneumothorax
and spontaneous pneumothorax , etc.
Size: 2000mL
Three Types of Connector: Straight, Reducer,
Tee can be chosen.

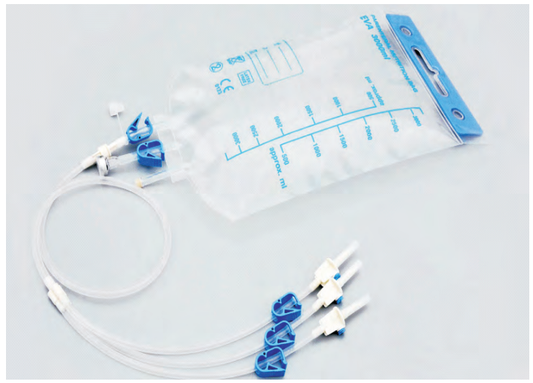

FY0241D
Disposable Dry Seal Chest Drainage System

The dry seal valve technique is designed
for added patient security which is perfect
for the drainage of fluid and gas in the
first aid.
Have hook and strap, can hang the drainage
device next to the bed or carry out.
Size: 500mL
Three Types of Connector: Straight,
Reducer, Tee can be chosen.

FY0334

Suction Liner

FY0247A Wide Mouth Type

Size: 2000ML, 3500ML

Product Characteristic:
Simplicity
Safety
Economical
With filter or without filter

Indication for Use:
This product is used for collecting the biohazardous fluids which produced in ICU and operation room.

Product Features:
1.Double safety design to ensure no liquid is suctioned back to the tubing and suction unit, effectively prevent cross infection and protect the medical staff safe.
2.It's made of environment-friendly polyethylene. It's safe and non-toxic.
3.Easy to use, can be a single use, also can use with the stander.
4.Available in some specifications: with or without shutoff filter, with or without solidifier, 1000mlml,1500ml and 2000ml.

Product Advantages:
1.Soft and transparent(Convenient for observation liquid waste)
2.Double safety design(To prevent fluid into the suction systems by mistake)
3.It can be connected with relevant suction device or vacuum device, soft bag is seal and reliable inside and can be withstand the pressure of 60kg when fully filled with liquid(Prevent infections liquid overflow caused by medical personnel) .

Specification: 1000ML 1500ML 2000ML 3000ML 3500ML

Wide mouth type or Straight type for different suction liner.
Unibody design with anti-impact material, the canister is high intensity, good transparency and easy to check the volume scale.
The T junction air way design is easy for the suction connection.

FY0249 Suction Liner System

FY024901 Suction Liner System 1 Canisters tandem
FY024902 Suction Liner System 2 Canisters tandem
FY024903 Suction Liner System 4 Canisters tandem

Our suction liner system mainly composed of a trolley, canister, a negative pressure gauge, suction liner, connecting tube and adapter.
Can be used with single, double, triple, or quadruple bottles
Different negative adapter can be chosen, Such as: American standard, British Standard, German Standard,etc

FY0503F
Disposable Infusion Set with Precision Filter

Precision solution filter: The filter medium has 5um,3um, 2um, filtration rate more than 90% for micro material above 5um,3um, 2um, effectively improve intravenous infusion safety, reduce near-term and long term damage caused by particles to human body.
Safety regulator:Adjusting range is 30mm and from zero to maximum,regulator is accurate and thick, undeformable.
"Types:PVC infusion set,PVC infusion set without DEHP, TPE infusion set,such infusion sets with better safety in turn and can meet different needs."

FY0502M
Infusion Set with Micro Regulator

Precision flow regulator for fine-tuning the flow rate in the range of 250ml/h for precise flow control.
The basic type liquid filter has a filtration rate of more than 80% for the particles of 15um; the filter medium of the precision type liquid filter has a design of 5um, 3um, and 2um, which is the filtration rate of 5um,3um and 2um in the liquid solution.The filtration rate is not less than 90%.It can effectively improve the safety of intravenous infusion and reduce the near-term damage and long-term damage which caused by particles to the human body.

FY0125
Pre-filled Saline Flush Syringe

Different size syringe barrel diameter is exact same as standard 10mL syringe barrel diameter to prevent vein or catheter damage.
Pre-Filled Syringe can be sterilized in two ways:
1.FY0125N, Normal Saline Syringes: Sterile fluid path, can not use in a sterile field
2.FY0125S, Sterile field saline syringes：Externally sterile, can use in a sterile field.

Advanced automatic drilling technology and equipment, a more accurate location and the pore diameter of the pipe, surface smooth and without cutting residues and injury.

Special custom polyurethane fine materials, delicate and smooth tube, welding head end, ultra smooth surface treatment and X line to show the position, make a catheter inserted into the blood vessels in more easy and safe.

FY6002
Hemodialysis Blood Tubing Set

Hemodialysis Blood Tubing Set Consists of arterial and venous lines, used during dialysis and are attached with A.V. fistula needle and dialyzer.

Features:
1. Medical grade materials displaying good biocompatibility.
2. Fluid pathway is smooth inside, no clotting or air bubbles.
3. Tubes are flexible, kink-resistant.
4. Color Coding.
5. Pump segment has excellent anti-fatigue performance.
6. Luer-lock connectors according to international standard.
7. Various series, good applicability.
8. Individual and customized services provided.

FY3007
Peripherally Inserted Central Catheter Kit

1. The connector is round and smooth with PASV valve.
A) Valve opens inward for sampling under negative pressure.
B) Valve opens outward for infusion under positive pressure.
C) Valve remains closed to prevent air embolism, blood reflux and clot under normal pressure
2. The catheter is made from premium silicone,which has excellent biocompatibility.
3. Adjustable length of catheter.
4. Detectable under X ray, the end tip enhances radiopacity.
5. The style of catheter ensures placement more convenient and smooth.
6. Variety of kit configuration, initial guide wire and positive, pressure needless connector is available for choice.
